The South African Standard SANS 54199:2017 Execution of Special Works – Micropiles was implemented by the South African Bureau of Standards in December 2017. This standard is the identical implementation of the European Norm EN 14199:2015, and is adopted with the permission of CEN.

The lectures will give an introductory vision of the Standard, related to the following subjects:

- Micropiles: definition, applications and typologies
- Materials
- Geotechnical Investigation
- Design, Execution, Supervision and Testing

Who should attend?

- Civil and Geotechnical Engineers (both Consultants and Contractors)
- Representatives of Authorities (i.e. Ministry of Public Works, High- and Railway's Administration, etc.)
- Academic Members (University Professors, Students, etc.)

Registration Cost:

Full Registration	R 950.00
SAICE Geotechnical Members	R 850.00
Students	R 100.00

Students are required to provide proof of registration.

Registrations:	13:00 – 14:00
Lecture:	14:00 – 15:30
Tea/Coffee Break:	15:30 – 16:00
Lecture:	16:00 – 17:30
Networking Function:	17:30
